

A Premium Cannabis Vaping Technology Brand

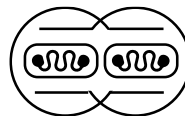

DUAL CORE

COSMIC EXPERIENCE

DUAL CORE
Cosmic Experience

DUAL CORE

Cosmic Experience

Offered with **DUAL PUREXCORE®**—More power and better stability for your favorite oils.

PURE TASTE DELIVERY

After reaching several advancements in micro-pore construction and heating track design, **PUREXCORE®** ensures 30% higher oil transfer velocity and full viscosity vaporization, allowing for more pure flavor to come through, preserving your oil's true flavor and provides a strong, satisfying puff by perfectly balancing each element in design.

FOR MORE FLAVOR PROTECTION

PUREXCORE® Heating Technology enables a device's TPM to be 7 points or higher than the industry average, producing far more vapor production from the first puff to the last.

Enjoy cutting-edge vaporization technology with Dual Purexcore Ceramic Heating Cores.

Adjustable power , preheating, and universally adaptable to various oil viscosities.

Always be aware of oil levels with a fully panoramic window, 5mL tank.

Intuitive user interface with sleek cyberpunk design.

Specifications:

- Tank Volume: 5.0ml
- Battery Capacity: 265mAh
- Tank Material: Food Grade PCTG
- WORKING Mode: Three-stage Power Setting
- Charging: Type-C
- Power Adjustability: 9W, 10.5W, 12W
- Activation method: Inhale & button
- Dimensions: 79 * 38 * 15 mm (6ml)

A Global Leader
In Vaping Technology Solutions

We are an innovative organization that creates industry-leading vaping products powered by Maxcore technologies. Started as a spin-off from global vaping manufacturing giant - FirstUnion, we are dedicated to help our clients capitalize on best products and get ahead in the market. Together, We maximize the future you can capitalize on. We carry a rich array of trending vape products that cater to today's cannabis user preferences and tastes. Our carefully crafted products are suitable for THC and CBD oils, perfectly matching different viscosity, enabling our consumers to enjoy a pure & flavorful vaping experience.

High Level R & D Laboratory

Established in January of 2016, the FirstUnion R&D Laboratory owns many pieces of advanced testing equipment operated by top professionals.

Our R&D Laboratory has a complete and effective quality management system that is **ISO/IEC17025 Certified**.

FirstUnion also established a Nationally Recognized **CNAS** Lab, which contributed greatly to complete the standards and technical specifications of the vape industry.

Principle of Service

Scientific / Fair / Accurate / Efficient

Our R&D Laboratory is Certified in **UL** and **NEMKO WTPD**. Our test data are mutually recognized by these renowned certification bodies.

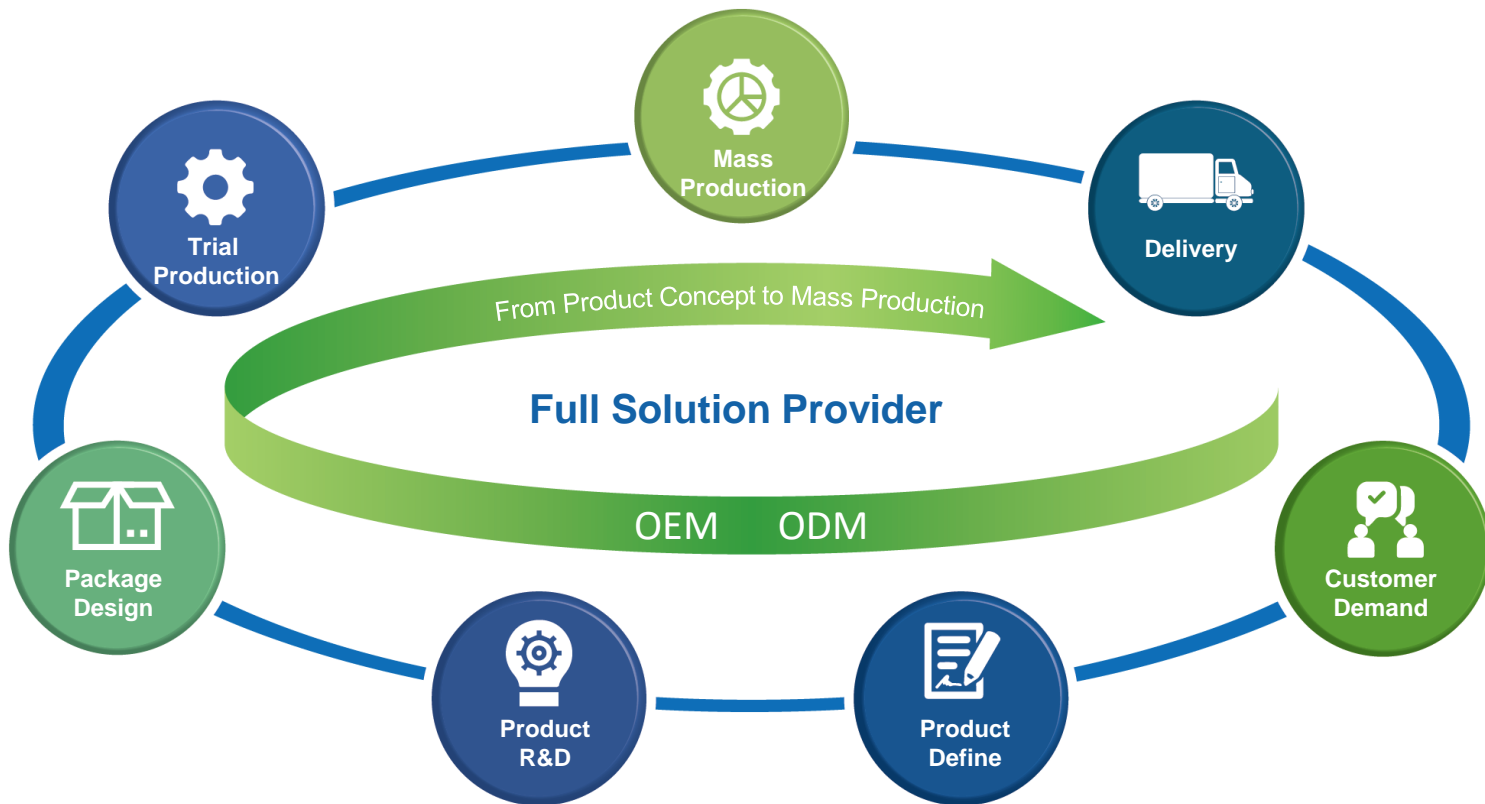

US TESTING LAB

FirstUnion opened its US based Office and Laboratory. With the capabilities for research and development and testing devices for longevity, environment, compatibility, and more, this gives us a unique position to not only service our US customers in a more efficient manner, but to also research new oil types the instant they come to the market to maximize flavor and performance.

Maxcore's US location is also staffed with onsite chemists, a product support engineer, our onsite graphic designer, our domestic sales support team, and our local research and development team. We are always looking for more ways to improve our services, assist our customers, and stay ahead of new trends and technologies.

>> ONE-STOP BUSINESS SERVICE

QUALITY & AUDIT CERTIFICATIONS

As a world-class vape manufacturer, FirstUnion passed ISO 9001 ISO13485, ISO14001, ISO 45001, QC080000, cGMP, UL8139 and multiple FDA certifications and audits. Our whole process, from raw materials supply, assembling, testing, packaging to warehousing and distribution conforms to international standards.
